

PARKING DECK WITH ELASTODRAIN EL200/202

The Parking Deck system is specifically designed to be applied on the roof of underground parking garages. Due to the accessibility and load bearing capacity of the roof and building construction, it is practical to use a stable and safe Green Roof system to allow for vehicular access.

The heavy duty ZinCo Protectodrain and Elastodrain systems are designed to withstand heavy loads and dynamic forces and are useful for a variety of walkways and driveways. Numerous possibilities exist and include anything from car parks and fire access roads to reinforced lawn and stone paving. The parking deck systems can be combined with other ZinCo Green Roof systems.

Technical Data:

System buildup height:	> 170 mm (6.5")
Slope:	2 – 10 degree
Saturated weight:	> 350 kg/m² (72 lbs/sqft)

1. Hard surfacing

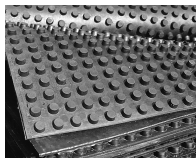

2. Gravel base

3. ZinCo system filter TG

4. ZinCo Elastodrain EL200/202

5. ZinCo slip & separation sheet TGF 20
