

PERENNIAL GARDEN WITH FLORADRAIN FD 40

The perennial garden is a more complex extensive green roof system and allows for the inclusion of various perennials and small shrubs in the plant selection. The larger capacity of the drainage layer and the thicker layer of growing medium (> 150 mm) facilitate this broader plant palette.

Apart from low-growing Sedum species, the plant community "Perennial Garden" also contains fragrant drought resistant herbs and small shrubs, like thyme and ornamental grasses, which can be completed by colorfully flowering species using a special planting design. Seed-sowing is an efficient way to plant the "Perennial Garden".

Technical Data:

System buildup height:	> 200 mm (>8")
Slope:	2 – 10 degree
Saturated weight:	160 kg/m² (32 lbs/sqft)
Water retention capacity:	42 l/ m²

1. 9 cm pot plants

2. Growing medium ZinCo Blend –E

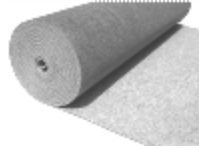

3. ZinCo system filter SF

4. ZinCo Floradrain FD40

5. ZinCo moisture protection mat SSM 45

6. ZinCo root barrier WSF 40
