

Product Data Sheet

Pre-cultivated Vegetation Mats (Standard Green)

Bullet Proof

Pre-cultivated vegetation mats with Sedum types

Information: It is necessary to install the plant mats directly after their receipt. The plant mats have to be irrigated to provide best possible growing conditions at the beginning. Depending on the climatic condition the mats can be spread out and stored for a few days. The plant mats are to be rolled out carefully and installed over an even growing medium surface.

Features

- min. of 12–14 different proven Sedum types
- herbs and grasses available upon request
- immediate coverage, therefore fast acceptance of completion/handover
- protection against wind and water erosion
- useable for embankments
- quick delivery possible
