

Product Data Sheet

Retention Spacer RSX 65 / RSX 100

Order No. 3402 / 3403

Powerful Spacer Elements made of polypropylene for their use on roof surfaces without any inclination, especially for retention build-ups meant for heavy load (e.g. in walkways and driveways).

The Spacer Elements can be connected with each other using special interlocks.

Technical Data

Retention Spacer RSX 65 **Order No. 3402**
Heavy duty Spacer Element made of polypropylene, cavity volume > 95 %.

Material: 100 % Polypropylene
Colour: green
Dimensions: ca. 0.60 m x 0.60 m
Height: ca. 65 mm
Weight: ca. 6.2 kg/m²
Maximum retention volume: ca. 60 l/m²

Compressive strength according to EN ISO 25619-2: up to 50 t/m²

Retention Spacer RSX 100 **Order No. 3403**

as above, except
Height: ca. 100 mm
Weight: ca. 6.5 kg/m²
Maximum retention volume: ca. 95 l/m²

On request also available with heights of 80 mm or 150 mm, providing the same pressure resistance and the same percentage cavity volume.

Accessories:

Plastic Connector **Order No. 9622**
(requirement: 4 pieces per element \approx ca. 11 pcs./m²)

Features

- provides for additional water retention on roofs without inclination
- developed specially for its use under high loads (e.g. walkways and driveways)
- high retention volume
- spacious channel system for aeration and drainage
- biologically and chemically neutral
- on request also deliverable in greater heights

Application Example

"Driveway with Retention Spacer RSX 65"

Paving slabs in a bedding of stone chippings

Gravel base layer

Filter Sheet PV

Retention Spacer RSX 65

Filter Sheet PV

Roof construction with waterproofing / waterproof concrete

Specification Suggestion

Spacer Elements made of polypropylene, height ca. 65 mm / 100 mm with an integrated multidirectional channel system, cavity volume > 95 %, max. retention volume ca. 60 l/m² / 95 l/m², compressive strength up to 50 t/m²,

delivery and installation according to manufacturer's instructions.
